

Kite Assembly Instructions

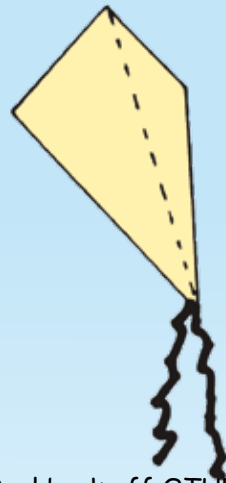

Kites For Schools

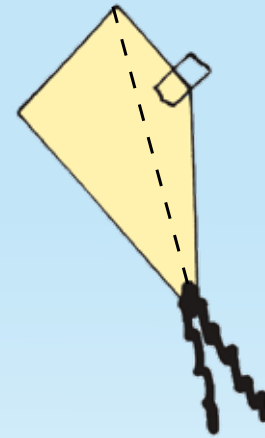

Fold tail in half and stick the middle of the tail to the bottom of the kite with washi tape.

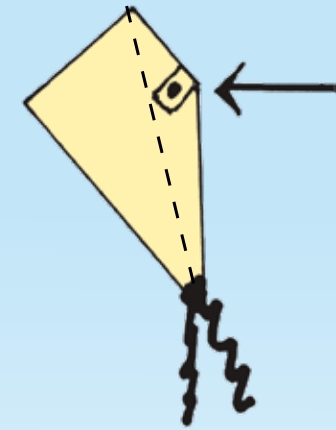

Peel off ONE SIDE ONLY of the double sided tape stick. Put it from the tail to ONE of the points at the top of the kite.

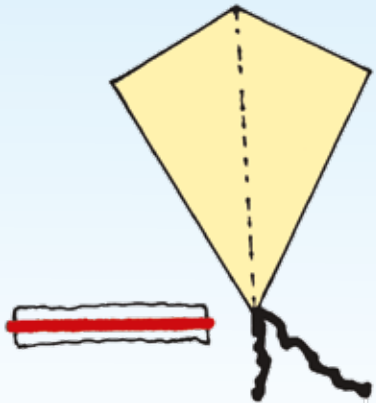

Peel back off OTHER SIDE of the double sided tape stick, fold kite in half and stick.

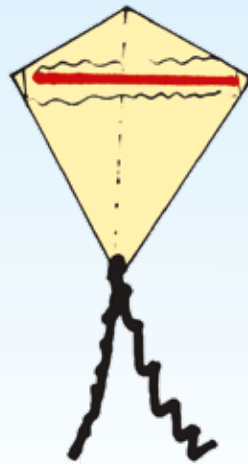

Put a piece of washi tape to the nose of kite, then fold around the front of the kite.

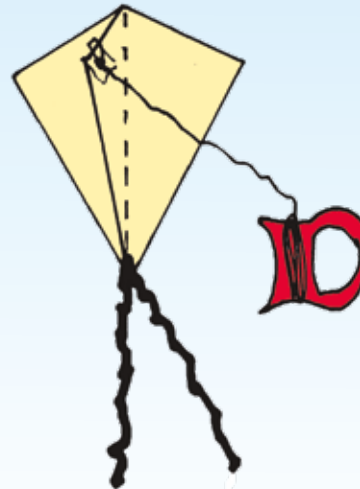

Make a hole directly in from the point of the kite.Use a punch, or if you don't have a punch maybe the point of a pen may work.

Put the red straw on a flat surface, cover straw with a length of washi tape.

Open out the kite, put straw and tape between the side points of the kite.

Turn kite over and tie line through hole.

Fly your kite

WARNING

Do not fly near overhead powerlines or during thunderstorms. - Never fly near busy roads or airports. Some localities have other laws and regulations governing kiteflying, check with your local authorities.
